

# [silwaCARRIER]

*Staying competitive requires strategic and optimized logistics management. silwaCARRIER is a software solution that offers a single and flexible interface to carriers, ideal for managing B2C and B2B flows. It automates carrier selection, printing and label application, ensuring flawless deliveries. It is **cloud-native** but can also **be deployed on-premise** to fit any need.*

## [The Software Solution]

**silwaCARRIER** is interfaced directly to our silwaSUITE and can be connected to any WMS software to generate customized labels for each shipment, automatically communicate delivery information, and monitor performance with accurate KPIs updated in real time.

## [I benefici]

- COMPATIBILITY WITH ALL CARRIERS**  
 silwaCARRIER **is already connected to a wide range of carriers**, from the most globally known to local ones, eliminating start-up costs and time. Being a proprietary product, it allows integration with any carrier and is also able to suggest new potential ones that can be connected.
- PAYMENT PER LABEL**  
 Eliminate fixed fees: with silwaCARRIER you pay only per printed label, **eliminating fixed costs** and optimizing spending. In addition, the connection with the carrier allows the reduction of label printing, reducing waste, and speeding up label operations.
- SMART TRACKING AND TOTAL CONTROL**  
 The product offers **accurate tracking** for every shipment, allowing customers to monitor the status of their order in real time. This level of transparency greatly enhances the shopping experience, ensures continuous and reliable communication, and refines your service.
- ZERO ERRORS, ACCURATE OPERATIONS**  
 With its intelligent auto-correction system, the system automatically **analyzes and eliminates any input errors** present in the shipping data. This feature ensures complete smoothness of operations and fast and accurate deliveries.
- AUTONOMY IN MEASUREMENTS**  
 silwaCARRIER enables you to efficiently control your **direct fleet** through the *Transporters App*, allowing you to manage it jointly with indirect transporters.
- ONU AGENDA 2030**  
 Total efficiency in shipping processes, fosters innovation in your business, while the reduction of printed labels promotes responsible consumption and production, helping you achieve **Goals 9 and 12 of the 2030 Agenda**.

## [Features]

It is a **comprehensive, flexible, customizable and affordable product** designed for autonomous shipment management with low service costs.

- **AN AFFORDABLE AND CUSTOMIZABLE PRODUCT**

silwaCARRIER is designed to be accessible to any type of company, large or small. You can **easily integrate any carrier**, from well-known names to local services, providing flexibility and adaptation to your specific needs. In addition, it is already pre-configured with a wide network of well-known carriers and integrates seamlessly with your WMS software, making shipment management even smoother and more intuitive.

- **AUTOMATE EVERY SHIPPING PROCESS**

With silwaCARRIER, your company benefits from a fully automated intelligent system that **optimizes every step of shipping**. It automatically selects the best carrier, reduces operating time and costs, and makes your service extremely competitive.

- **ADAPTABLE AND INTUITIVE INTERFACE**

silwaCARRIER features a user-friendly portal that allows your customer to **view the progress of shipments**. You can customize its functionality and layout to suit the needs of your industry. In addition, through integration with the **silwaCARRIER App**, you can also manage your direct fleet and allow each operator to be informed in real-time.
