

# [silwaGO]

*silwaGO is the Warehouse Management solution built for the needs of modern companies. Born from silwaSUITE, it is complete, reliable and allows you to optimize the logistics flows of small and large companies, while ensuring scalability, efficiency, and savings.*

## [The Software Solution]

- **COMPLETE AND SCALABLE**

silwaGO combines in a single product all the functionalities needed to efficiently manage warehouse logistics. Built to satisfy the demands of modern companies, it is the simple, streamlined solution that allows you to scale and prepare your business for the full silwaSUITE.

- **RELIABILITY**

silwaGO, based on Stesi's silwaSUITE, is the ideal solution for companies that want to better manage their warehouse flows and enrich their business offerings.

- **TOTAL CONTROL OF LOGISTICS FLOWS**

silwaGO efficiently manages all internal supply chain flows, reducing time and costs, from goods receipt—configurable according to pallets, packages, and individual items—to product shipment.

- **360° FUNCTIONAL COVERAGE**

silwaGO also includes advanced features from silwaSUITE. These include picking—configurable according to pallets, packages, and individual items—flexible pallet handling, and remote stock visibility per customer.

- **INTEGRABLE WITH ALL SYSTEMS**

silwaGO is ready to connect to any management system and ensures full compatibility with ERPs on the market.

- **CONNECTIVITY**

It allows operation with Wi-Fi or with 4G/5G and allows the use of Android handheld devices, including smartphones, making it a ready-to-go solution.

- **PERFECT FOR SMALL AND LARGE BUSINESSES**

silwaGO promptly meets the needs of small and medium enterprises that require a simple, comprehensive solution with an excellent price-quality ratio.

## [Functionalities]

Area	Function
Features	Mobile Users max 3
	Workstation Users max 1
	User Manual
Management	Printer Management
	User Management
	Application Theme management
Mapping	Warehouse size max 1000 locations
	Locations Printing from Workstation
Imports - ERP	Import Panel
	Import – Items
	Import – Entities
	Import – Inbound Documents
	Import – Outbound Documents
